

Environmental Policy

PA Fire Systems Limited is committed minimising the impact of its activities on the environment and we will encourage customers, suppliers and other stakeholders to do the same.

The key points of its strategy to achieve this are:

- Minimise waste by evaluating operations and ensuring they are as efficient as possible.
- Minimise toxic emissions through the selection and use of its fleet and the source of its power requirement.
- Actively promote recycling both internally and amongst its customers and suppliers.
- Source and promote a product range to minimise the environmental impact of both production and distribution.

We focus on these specific areas:

Recycling / Waste Disposal

All disposal items applicable for recycling are separated and stored separately. Accounts are held with waste disposal / recycling companies chosen specifically for their outstanding recycling percentage. Items specifically recycled are:

- All packaging
- Wee waste
- Fire Extinguishers and unused contents
- Smoke detectors
- Batteries

Paper

- We will minimise the use of paper in the office.
- We will reduce packaging as much as possible.
- We will seek to buy recycled and recyclable paper products.

Energy and Water

- We will seek to reduce the amount of energy used as much as possible.
- Lights and electrical equipment will be switched off when not in use.
- Heating will be adjusted with energy consumption in mind.
- The energy consumption and efficiency of new products will be taken into account when purchasing.

Office Supplies

- We will evaluate if the need can be met in another way.
- We will evaluate the environmental impact of any new products we intend to purchase.
- We will favour more environmentally friendly and efficient products wherever possible.

Transportation

- We will reduce the need to travel, restricting to necessity trips only.
- We will promote the use of travel alternatives such as e-mail or video/phone conferencing.
- We will favour 'green' vehicles and maintain them rigorously to ensure ongoing efficiency.

Maintenance and Cleaning

- Cleaning materials used will be as environmentally friendly as possible.
- Materials used in office refurbishment will be as environmentally friendly as possible.
- We will only use licensed and appropriate organisations to dispose of waste.
